

Web-based Centralized Time and Attendance & Payroll Software

AiTIME is a comprehensive time and attendance management software designed to integrate seamlessly with various biometric devices such as those from ZKTeco, HIKVISION, and DAHUA. Key features include:

Device Connectivity: Supports Ethernet, WIFI, 3G/4G connections to standalone push communication devices, providing reliable communication with thousands of devices.

Private Cloud: Acts as a private cloud, offering employee self-service via mobile applications and web browsers. User Interface: Intuitive interface to manage timetables, shifts, and schedules, simplifying attendance tracking.

Reporting: Generates quick attendance reports with roster and overtime management, making employee scheduling more efficient.

Dashboard: Modern dashboard for real-time monitoring of attendance summaries, device status, and request approvals (approved/rejected/pending).

API Integration: Built-in API for connecting to third-party software.

Overall, AiTIME is designed to streamline attendance and workforce management across various industries.
